QX50

This IP PBX is designed for offices of up to 50 users and supports up to 16 concurrent calls.

The QX50 comes with 16 IP devices activated and can scale up to 48 IP devices.

The QX50 has two FXO analog PSTN connections and two FXS analog station ports.

The QX50 includes SIP trunking, so it can connect directly to an ITSP with no additional equipment

QX200

- The QX200 is designed for offices of up to 202 users and supports up to 64 concurrent calls.
- The QX200 comes with 24 IP devices activated and can scale up to 200 IP devices.
- The QX200 has four FXO ports to connect to the PSTN and two FXS ports for analog phones or fax machines.
- The QX200 includes SIP trunking, so it can connect directly to an ITSP with no additional equipment.

QX2000

- The QX2000 is designed for offices of up to 2,000 users and supports up to 300 concurrent calls.
- The QX2000 comes with 200 IP devices activated and can scale up to 2,000 IP devices.
- Additional FXS, FXO, ISDN BRI, E1 and T1 ports may be added to the system with the purchase of Epygi QX Gateways.
- The QX2000 includes SIP trunking, so it can connect directly to an ITSP with no additional equipment.
